

Observatory of Soils and Ecosystems of the Southwest of Antioquia (OSES)

Focus area - Phase 1 (2023-2026)

Soil Health towards Sustainable Development & "One Health"

Soil studies

(High-resolution primary data)

- Trophic webs
 - Microorganisms
 - Invertebrates
 - Mycorrhizae
- Physico-chemical
- Hydrogeology
- Regeneration processes

Earth systems

(Mathematical models)

- Soil carbon inventories
- Vegetation models
- Hydrologic models
- Regional climate models
- Atmospheric chemistry

Geoportal

(<https://www.osesa.org>)

- Open data
- Environmental management support

Regional dialogue

(Community participation)

- *Cátedra del suelo*
- Technical workshops
- "Biodiversity School"
